Pedro Menchero García Olías

ServiceNow solution and integration architect

pedro.menchero@gmail.com linkedin.com/in/pedromenchero pedromenchero.github.io

Based in Spain, working remotely across Europe

Profile

Solution and integration architect specialising in ServiceNow, working in IT service management since 2009 for multinational and local enterprises in Spain, the United Kingdom, the Netherlands and Brazil.

I lead multidisciplinary teams and work directly with C-level executives to design, integrate and deploy platform solutions shaped around each client's business processes. Analytical, organised and customer-focused, with a strong interest in what well-integrated technology does for efficiency, capacity and performance.

Certifications

CIS-DF ServiceNow Certified Implementation Specialist – Data Foundations (CMDB and CSDM), 2026

CIS-ITSM ServiceNow Certified Implementation Specialist – IT Service Management, 2020

CMDB and CSDM
Customer service management
Workplace service management
Agile delivery

Platforms and frameworks

ServiceNow, BMC Remedy, ITIL 4, Scrum, DevOps

Languages

Spanish (native), English (professional)

Experience

2021 – present

Integration and solution architect, Freelance, multiple clients

Brought in to design integrations, set technical governance and keep enterprise ServiceNow platforms healthy as they grow. I set architecture standards, review platform capabilities against best practice, and mentor the development teams who build on them.

> **BASF.** Architecting a federated CMDB fed by more than 150 interfaces, replacing legacy third-party applications.

> **Heineken.** Taking the platform I started at Plat4mation further by integrating it with the rest of Heineken's application portfolio.

> **Workplace Service Delivery.** Solution architect. Several implementations of ServiceNow's workplace suite for different clients.

> **Deloitte.** Technical adviser on multiple ServiceNow engagements.

2019 – 2021

Senior manager, Plat4mation, Netherlands

Led ServiceNow delivery and key client relationships: workshops, technical consulting across IT service, IT business and customer service management, project scoping and milestones. Managed and appraised a multicultural team, aligned its work with company goals, and mentored new joiners in ServiceNow best practice.

> **Heineken.** Project manager and solution architect. Architected a custom lean manufacturing application, rolled out to more than 100 breweries in two years.

ServiceNow. Project manager, integration and solution architect. Delivered knowledge management for ServiceNow's own Field Security department, with contextual search inside Slack.

ING. Integration and solution architect. Advised on integration best practice across an ecosystem of 12 ServiceNow instances.

TBI. Integration and solution architect. Advised the client on ITSM processes and ServiceNow.

2017 – 2019

Manager, Deloitte, Spain

Helped grow Deloitte's ServiceNow practice in Spain. Ran engagements end to end: presales, proofs of concept, requirements, design, quality assurance, implementation and go-live support. Recruited and led interdisciplinary teams of internal and external specialists, and shaped the firm's ServiceNow delivery practices.

Bankia. Project manager and solution architect. Assessed process gaps and performance issues for the CEO, then replaced 8 legacy applications with ServiceNow Customer Service Management.

CaixaBank. Project manager, solution architect and account manager. Introduced ServiceNow customer service management for incidents and claims on appliances sold through the bank.

Banco Santander. Integration architect. Designed the integration between ServiceNow IT business management, SAP and third-party project tools.

2015 – 2017

Manager, Devoteam, Spain

Project manager and solution architect. Ran large multinational ServiceNow projects from scoping and risk management to go-live, and supported presales with proposals, proofs of concept and demos. Set KPIs and delivery standards for the PMO, recruited and trained developers, and led corrective actions on design and code quality.

SICPA. Rolled out ITSM, Field Service and Event Management for the Swiss security-ink company, coordinating teams in Madrid, Luxembourg and Switzerland.

Inversis. Replaced the bank's custom applications with ServiceNow ITSM and ITBM, and introduced ITIL processes.

Devoteam. Created the standard software development lifecycle used across the company's IT projects.

2014 – 2015

ITSM solution architect, Quintica, United Kingdom

Set integration requirements and design standards for BMC Remedy and third-party systems. Owned the CMDB data model, incident reporting and troubleshooting, and coordinated third-party providers.

Arqiva. Integration architect and developer. Designed and led the integration architecture connecting BMC Remedy, legacy systems and mainframe-synchronised applications for the UK broadcast and telecoms infrastructure company.

2010 – 2014

ITSM senior consultant, Devoteam, Spain

Grew into project manager and solution architect on BMC Remedy: requirements workshops, deployments, load-balanced server environments, CMDB design and telephony integration.

Telefónica International. Built a worldwide service catalogue on BMC Remedy, including a secondment to Brazil for a high-profile customer.

Banco Santander. Implemented ITIL incident, problem and change management.

RENFE. Designed how Spain's national railway manages critical incidents such as natural disasters and accidents.

Mercadona. Integration architect and developer. Integrated BMC Remedy with Cisco VoIP telephony to speed up incident response and resolution.

2009 – 2010

Developer, REM Solutions, Spain

Built, configured and supported (level 3) BMC Remedy ARS 7 modules for incident, change, CMDB and service request management.
